

Help Sheet

Lines
Draw a line. You can change the thickness by choosing *Options* on the right side of the screen and the colour using the *Colour Palette*.

File
This a menu where you can save your drawings and open drawings you have previous made. If you want continue a piece of work in PixilArt, choose Save as .PIXIL

Select
This menu can be used to copy and paste a selected object.

Undo
Select the undo icon to go back a step if you make a mistake.

Canvas
The page where we draw the pictures. The size of it can be selected in pixels when you start a new drawing. e.g 500 x 500.

Shapes
Draw a shape. You can change the thickness by choosing *Options* on the right side of the screen and the colour using the *Colour Palette*.

Fill
Fill a shape or the canvas a colour by selecting the colour from the *Colour Palette*, then the bucket, then click or tap inside the shape/canvas.

Zoom in/out
Zoom in to add detail. Move the blue box around the navigation window to move around the canvas.

Move
Move a layer around, this is useful for making animations.

Options
The Options tab can be used to change the thickness of a line or shape.

Select
Choose this square and then draw a box around an object to select it. Then you can copy it to make another one.

Layers
Use these tools to add more layers with the +. Layers can be used to create animation.

Stamps
A library of graphics. You can search for graphics, such as bricks, flowers etc.

GIF Frames
Select this to start creating an animation using frames.

Copy Frame
When making an animation, make a copy of a frame and then move a layer slightly.

Preview
Watch your animation.

Colour Palette
Choose a colour for your lines, shapes and fill effects here. Use the grey scroll box for more colours.
